

Total Security

Padlock Range

The new ERA Padlock range is suitable for both domestic and commercial applications. The Domestic Range is available in both standard and high security in easily merchandised packaging. Laminated, weather proof, brass and combination padlocks all have individual security ratings and advice on application; allowing customers to pick the most suitable product for their requirements.

The Professional Range are packaged in a retail box and are available in standard, closed and long shackle designs. Manufactured from hardened steel with a Molybdenum hardened shackle, the five double pin cylinder with magnetic pin gives ultimate anti-pick, anti-bump and anti-drill resistance.

The use of Molybdenum stainless steel gives the padlocks a smooth surface finish and is used in the manufacture of missiles, aircrafts and within the power industry due to its enhanced corrosion resistance. The use of hardened steel within the shackle protects it from sawing and cutting and the dual stainless steel ball bearing locking ensures the shackle is protected against potential pull attacks.

The ERA security rating system provides a visual indication of the security level for that specific product on the packaging giving customers key information when purchasing.

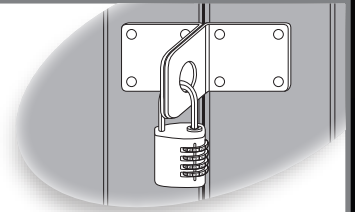

Padlocks Security

Black Combination Padlock

- Aluminium lock case
- Steel Shackle
- Keyless convenience
- Easily resettable combination
- 1,000 (20mm version) - 10,000 (30 and 40mm version) combinations
- Available in 20mm (3 dial), 30mm (4 dial) and 40mm (4 dial) sizes

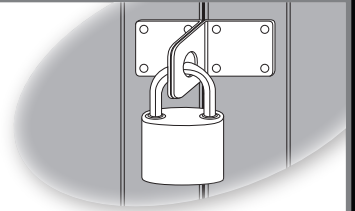

Security rating for 40mm version

Solid Brass Padlock

- Brass lock case with Molybdenum hardened shackle
- Hardened steel shackle, protects it from sawing and cutting
- Double lever locking mechanism with two hardened steel pins
- Sealed shackle for enhanced weather protection
- Available in 20mm, 40mm standard shackle, 40mm long shackle, 40mm twin pack, 50mm and 60mm sizes

Anti drill, bump and pick excludes 20mm size

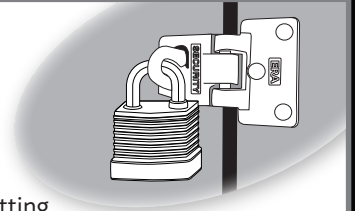

Security rating for 60mm version

Weather Proof Laminated Padlock

- Steel lock body with laminated case
- PVCu case cover to protect surface and sliding key cover
- Molybdenum hardened steel shackle to protect against sawing and cutting
- 5 pin brass cylinder
- Dual stainless steel ball bearing locking ensures shackle is protected against pull attacks
- Available in 45mm and 55mm versions

Anti drill, bump and pick excludes 20mm size

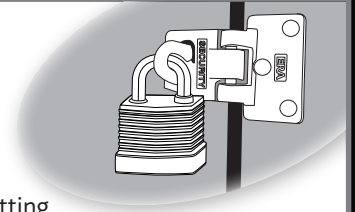

Security rating for 55mm version

High Security Laminated Padlock

- Steel lock body with laminated case
- PVCu case cover to protect surface and keyhole cover
- Molybdenum hardened steel shackle to protect against sawing and cutting
- 5 pin brass cylinder
- Dual stainless steel ball bearing locking ensures shackle is protected against pull attacks
- Available in 45mm and 55mm versions

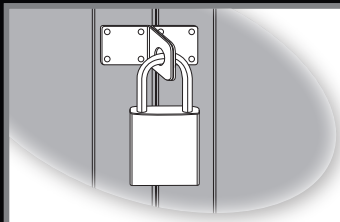

Anti drill, bump and pick excludes 20mm size

Security rating for 55mm version

Padlocks High Security

High Security Aluminium Padlock

- Solid anodised aluminium lock body
- Hardened steel shackle, protects from sawing and cutting
- Rekeyable and changeable 6 pin brass cylinder
- Dual stainless steel ball bearing locking ensuring protection from pull attacks
- Available in 38mm standard shackle, 38mm long shackle, 45mm standard shackle and 45mm long shackle
- Anti drill cover plate

Security rating
for 45mm version
